

Course description

Product training “Administrator 4”

Training contents

In this training the participants will learn about the various modules of the software Administrator 4. The functionality of each module and the handling of the Data Viewer – a special analysis tool – are paramount. The basics of communication technology are presented additionally.

Training objective

After the training the participants are able to use each module of the software Administrator 4 for monitoring configurations and analysis of the measurements. The attendance of the course will be confirmed by a certificate.

Target group

Technicians and engineers working in maintenance, who plan to use one of the FAG online devices (FAG ProCheck or FAG DTECT X1).

Previous knowledge in the field of condition monitoring and vibration analysis is recommended.

Duration

2 days

Venue

- FAG Industrial Services GmbH, Herzogenrath
- At customer site

Number of participants

4 - 8 attendees
