

Course description

Product training “FAG DTECT X1 / X1s”

Training contents

This course gives well-founded knowledge on the online monitoring system FAG DTECT X1 in relation to functionality, possible applications, functional principles and handling. A special emphasis is put on the manifold configuration possibilities of the system. In practical exercises you can further deepen your knowledge on the device.

Training objective

After the training the participants can configure the monitoring device FAG DTECT X1 independently and prepare, implement and evaluate measurement processes. The attendance of the course will be confirmed by a certificate.

Target group

Technicians and engineers working in maintenance. The participant must have previously attended the product training “Administrator 4”.

Duration

2 days

Venue

- FAG Industrial Services GmbH, Herzogenrath
- At customer site

Number of participants

4 - 8 attendees

Dates

English training courses are offered on request.
