

### Course description

## Product training “FAG ProCheck”

### Training contents

In this training the participant will acquire knowledge about the online monitoring system FAG ProCheck. The focus is on the configuration and independent preparation, implementation and evaluation of a measurement process using practical examples.

### Training objective

After attending the course the participant should be able to independently configure the monitoring device FAG ProCheck and prepare, implement and evaluate measurement processes. The attendance of the course will be confirmed by a certificate.

### Target group

Technicians and engineers working in maintenance. The participant must have previously attended the product training “Administrator 4”.

### Duration

2 days

### Venue

- FAG Industrial Services GmbH, Herzogenrath
- At customer site

### Number of participants

4 - 8 attendees

### Dates

English training courses are offered on request.
